

KOOI-FLATFORKS Indicator®

KOOI-FLATFORK is a smart device that helps the forklift truck driver to level the forks horizontally. Sometimes its difficult for the forklift operator to see if the forks are level and this can be a big risk. For example when the forks are standing too much forward the pallet can get crushed or even worse the pallet can get pushed off the gantry.

The KOOI-FLATFORK can increase handling speed because the forklift truck operator will always know that his forks are lever therefore he knows he can pick up pallets without questioning if his forks are level.

Improves safety, Reduce damages, Increase productivity.

Features

- Very simple installation because of magnets
- Accurate within 0.25 of a degree.
- Simple to calibrate
- Clear LED light display
- Two years warranty

Benefits

- Get started quickly, no tools, no wires.
- Shows you when the load is true horizontal and when it's not
- One-year (1600 hours) average battery life.
- Zero mainatanance

Specifications

- Uses 2 pieces alkaline batteries 1.5Volts
- Operating temperature minus 30 °C / maximum 50 °C
- Ingress Protection IP 67
- Housing plastic covering
- L x W x H : 65 x 60 x 165 mm
- CE Directive 2006/42/EC

Wrong procedure as the mast should be absolutely vertical. Take control of these problems, by using the KOOI-FLATFORKS Indicator®
